

JOB OPPORTUNITY – Casenet, s.r.o.

Java Developer

We are looking for motivated, team oriented individuals of all skill levels (junior, mid-level, senior) to join an ambitious US based software company making a powerful impact in the healthcare industry. We are now hiring employees for our Prague office.

Responsibilities

You will be responsible for Java development and implementation (coding) of functional and non-functional requirements. Your responsibilities will also include:

- Participation in architectural reviews
- Performance analysis and tuning
- Collaboration with other members of the architecture, engineering and QA teams
- On a daily basis, you will interface with our central office USA employees, specifically other developers, architects and our DBAs to participate in requirements definition and implementation

The candidate may be required to travel to the USA once or twice a year for a short period of time (typically 7 to 10 days)

Job Requirements

Required skills:

- Java programming experience (preferably using Java 1.5 or 1.6)
- Writing SQL code
- Strong written and verbal English is a must.
- A positive outlook, a passion for software engineering and the ability to work as part of a team.

Desired skills:

- Experience with JPA, Hibernate and Spring Framework is a plus
- Experience with Adobe Flex is a plus
- Experience building web applications is a plus
- SQL Server experience is a plus

We offer

- A competitive salary
- Work for an exciting, fast growing international company
- Work with leading technologies and experts in the field
